## Managing environmental issues

1. Implement sustainable gardening practices: Our primary objective is to promote and implement sustainable gardening practices that minimize environmental impact, such as using organic and natural fertilizers, reducing water usage through efficient irrigation methods, and promoting biodiversity in garden designs.
2. Reduce chemical usage: We aim to significantly reduce or eliminate the use of harmful chemicals and pesticides in our gardening operations, thereby minimizing pollution and protecting the health of ecosystems and wildlife.
3. Promote wildlife-friendly gardens: We seek to encourage the creation of wildlife-friendly gardens that provide habitats for beneficial insects, birds, and other wildlife, thus contributing to the conservation of biodiversity and the natural environment.
4. Educate and engage customers: We are committed to educating and engaging our customers about the importance of environmentally friendly gardening practices, offering resources and guidance on sustainable gardening techniques and the selection of native plants to support local ecosystems.
5. Minimize waste and promote recycling: Our company is dedicated to minimizing waste generation and promoting recycling initiatives, including the use of composting, mulching, and responsible disposal of green waste to reduce our environmental footprint.
6. Support local and sustainable sourcing: We strive to prioritize the use of locally sourced and sustainable materials, such as native plants and organic gardening products, to reduce carbon emissions associated with transportation and to support local economies.
7. Continuous improvement through measurement and evaluation: We are committed to regularly measuring and evaluating our environmental performance, seeking continuous improvement through the setting of benchmarks and targets to reduce our ecological impact. These objectives reflect the company's dedication to promoting environmentally responsible practices throughout its operations, from garden design and maintenance to customer education and supplier partnerships.
